Who We Are

Our multidisciplinary team was founded at Stanford school's Design for Service Innovation course in March 2011. We saw a need to innovate upon current catheters in the market, so we applied design thinking methodologies and worked with dozens of physicians, nurses and catheter users to develop CompactCath.

Fast forward six years later, in 2017, we acquired FDA approval and are finally ready to bring CompactCath to you!

Our Mission

Designed at Stanford University, CompactCath was created by a team of physicians, engineers, and catheter users like yourself who share a commitment to improve the quality of life for those who need to self-catheterise.

CompactCath® is driven by a goal to design medical devices that enable those with chronic conditions to lead active, thriving, independent lives.

**All products are DEHP,
BPA & rubber latex free.**

 Here with you, wherever you go.

CompactCath®

Easy, discreet, and complete catheterisation at your fingertips. CompactCath® Lite is the only 16" catheter that is pre-lubricated, 100% non-touch, and fits in the palm of your hand—literally.

Classic

• STRAIGHT • COUDÉ

Featuring the world's first "Case Up, Tip Up" design.

Lite

• STRAIGHT • COUDÉ

Designed to fit wherever you go, providing maximum privacy, portability, and convenience.

The CompactCath® Advantage

Hygienic, Non-Touch Insertion

The advance sheath and plastic case protect the catheter from being touched, increasing sterility and reducing risk of potential contamination developing UTI's.

Fire-Polished Eyelets

CompactCath's super smooth eyelets offer pain free catheterisation, minimising risk of developing micro-abrasions which can lead to a buildup of scar tissue in the long term.

Pre-Lubricated

CompactCath is pre-lubricated with silicone oil, offering a lubricious non-sticky, no-drip coating. Less friction means less pain and discomfort during catheterisation.

Drainage Control

Only CompactCath offers a unique flow control technology, giving you complete control of when and where to void.

Discreet Disposal

CompactCath's retraction dial allows the catheter to be coiled back in place for easy, discreet disposal after use and without making a mess.

OneCath®

OneCath® classic is a high-quality catheter at an affordable price point, designed to improve the lives of patients and help in an industry with continuously rising health costs.

Classic

• STRAIGHT • COUDÉ

High quality catheter at an affordable price point, designed to improve the lives of patients.

Lubricated

• STRAIGHT • COUDÉ

Double Protections: Antimicrobial + Non-touch Insertion. The Real Ready to Use.

Hydro

• STRAIGHT • COUDÉ

Available in male and female sizes

Excellent balances between flexibility and rigidity, providing maximum control and comfort when handling, inserting, and draining.
