

Danis Procedure Pack

SX-ELLA Stent Danis

Danis

Removable stent system for treatment of bleeding esophageal varices

Easy implantation without the need for endoscopy / X-Ray control

Secure hemostasis through direct compression of varices

Oral intake maintained from time of implantation

Basic description

Procedure Pack with SX-ELLA Stent Danis

Self-expandable nitinol stent preloaded in a ready-to-use delivery system
Complete procedure pack including all items required for implantation

Indications

Acute bleeding from esophageal varices

Contraindications

Esophageal strictures
Recent radiotherapy of the esophagus
Tumors of the upper respiratory tract, esophagus or stomach
Upper GIT bleeding from other causes (e.g. perforation)

Features / Benefits

- ☑ Variable pitches in stent weaving conform to esophageal peristalsis / Reduced migration rates
- ☑ Standardized compression of the varices results in effective hemostasis
- ☑ Atraumatic stent ends
- ☑ Radiopaque markers at both stent ends and at the midpoint / Accurate stent positioning
- ☑ Retrieval loops made of medical grade alloy at both stent ends / High mechanical durability and acid resistance
- ☑ Easy endoscopic stent removal after 7 days

Benefits of the method

- ☑ Readily implantable without endoscopy / X-Ray control, also in emergency situations
- ☑ Patient can continue an oral diet after stent implantation

Additional description

Danis Procedure Pack (019-08S-25-135) consists of a plastic carry case containing all items required for stent implantation:

Delivery system preloaded with stent, guide wire, plastic syringes, mouthpiece, kidney dish, slobber cloth, waste bag with clip, sterile gloves
