

RESTOREX[®]

Next Generation Penile Traction Therapy

An easy-to-use solution to maintain penile length after prostatectomy

✓ Developed in cooperation with Mayo Clinic

✓ Results from only two, 30-minute treatments per day for 5 months

- Start treatment sessions 1 month after surgery
- On average, men using RestoreX gained 2cm in length*
- Erectile function only declined 4 points while men that did not use RestoreX (control group) lost 9 points, on average, due to their surgery*
- 89% of men in the study would recommend to a friend to use RestoreX after a prostatectomy*
- No long-term complications were associated with RestoreX treatment*
- Study results can be reviewed in full at <https://endopersonalcare.com.au/products/restorex-penile-traction-therapy>

✓ Invented by a Urologist specialising in Men's Sexual Health

✓ Patented technologies including Optimised Traction Zone

✓ Available and serviced in Australia

✓ 12-month warranty
